

WHAT ARE YOUR ENGINEERING DOCUMENTS REALLY WORTH?

Take Control of Your Engineering Content

It's Time to Calculate the Cost of Opportunity Lost

CENTRALIZED SOURCE OF TRUTH

An EDM system like Synergis Adept provides centralized access and control of facility as-builts, equipment drawing, capital project documentation and product data. It aligns teams so everyone is on the same page, drives efficiencies and ensures document control best practices happen automatically.

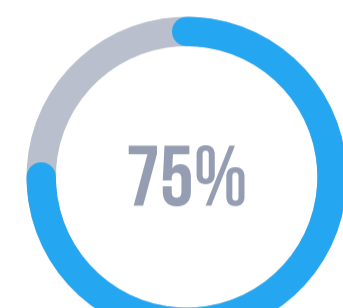

Suppose a company has 1M documents of which 2% are viewed monthly. If you could save - 2 min. per view @ \$300/hr of opportunity cost, you would save \$2.4M annually!

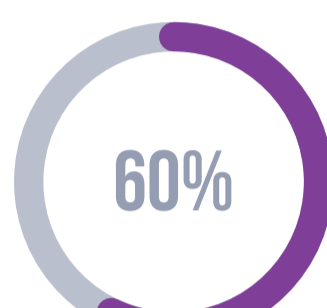

\$2.4M
SAVED ANNUALLY

Automate Workflow & Simplify Collaboration

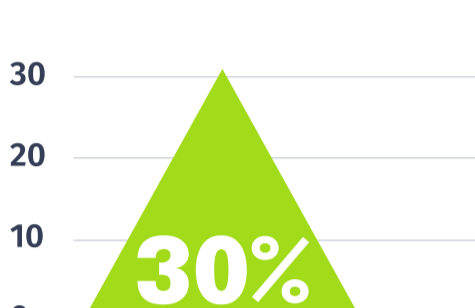

It's Time to Transform the Way You Work

75% of employees say they do better work when collaborating.

60% of employees report being more innovative in a collaborative environment.

30% increase in productivity seen by business leaders in collaborative workplaces.

BUILT-IN VERSION CONTROL

Easy access to the latest document version reduces safety and reliability concerns, compliance issues and wasted time.

VISUALIZATION & MARKUP FOR NON-CAD USERS

EDM makes it easy for those on the plant floor or in the field to find, view and markup virtually any document.

WORKFLOW AUTOMATION

Time-based alerts and notifications help to identify bottlenecks, so work is completed on time.

EDM provides the pieces for successful collaboration.

Suppose a company has 75 design documents that need to be accessed by a remote team daily. With vault replication, Adept has been proven to reduce document access time from 5 min to 15 sec. At \$300/hr of opportunity cost, you would save \$463K annually!

\$463K
SAVED ANNUALLY

Complete Engineering Projects Faster

It's Time to Automate Project Turnover

50% of projects experience issues due to inadequate knowledge transfer during handovers.

Forcing owner-operators to spend

2-4%

of the project cost to correct and reproduce missing operations and maintenance information manually.

Get ahead of project delays with Adept.

BETTER ROI ON CAPITAL PROJECTS

Adept can enhance project planning, budgeting and outcomes to satisfy expectations from regulators, shareholders and other stakeholders.

SEAMLESS CAD INTEGRATION

Having Adept available right inside your CAD application enhances design workflow while maintaining file relationships.

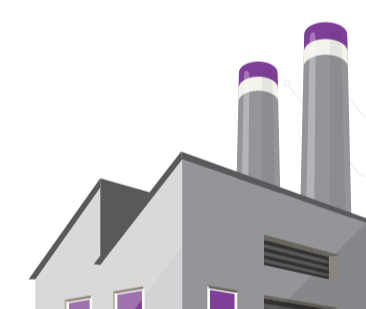

An integrated chemical manufacturing facility produces 1.5 MT of ethylene at \$1.6M per day. At 1-2 days faster project completion, you would get \$2.6-\$5.2M of extra production!

\$5.2M
EXTRA REVENUE

Protect Your Documents & Intellectual Property

It's Time to Secure Your Valuable Data

81% of manufacturing companies experienced some form of IP theft, trade secret misappropriation, or industrial espionage.

Global data indicates that the average cost of a data breach in 2024 was approximately

\$4.8M

Your engineering content is a valuable asset worth protecting.

SECURE EVERYTHING

From creation to review, editing and approvals, a document can easily cost \$1,000. If you have 250K documents, you've got an asset that's worth \$250M! Adept is the platform to manage, share and protect this critical asset.

ENHANCED SECURITY & TRACEABILITY

Enjoy greater confidence in the availability, integrity and confidentiality of your data while meeting compliance requirements.

Estimated risk of a data theft incident, including intellectual property, is 81%. The average cost of an data theft incident is estimated to be \$4.8M. Adept is estimated to reduce that risk by 25%, lowering your risk profile by \$988K.

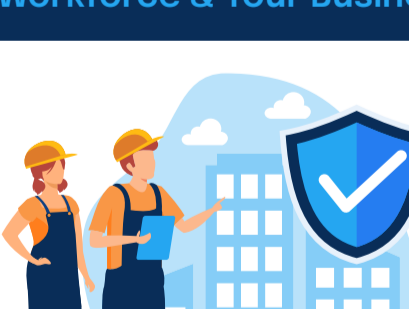

\$988K
LOWER RISK PROFILE

Ensure Safety & Regulatory Compliance

It's Time to Protect Your Workforce & Your Business

\$1M-\$10M is the cost of one serious accident in a manufacturing facility, separate of \$50K to \$200K increases in insurance.

\$500K-\$10M are the costs of a non-compliance event in a manufacturing facility

Avoid safety incidents with Adept.

INCREASED SAFETY & RELIABILITY

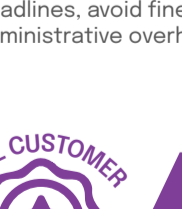

Managing documents is a life-critical standard. If someone follows an out-of-date procedure or works from an unapproved version, it could result in people being harmed or killed.

SIMPLIFIED COMPLIANCE

Automating and streamlining processes for regulatory compliance helps utilities meet deadlines, avoid fines and reduce administrative overhead.

The risk of a compliance issue in a manufacturing company can range from 10% to 60%, while the average cost of noncompliance is \$14.82 million. If your risk of a compliance issue is 30%, and Adept can lower that risk to 25%, you lower your risk profile by \$741K per year.

\$741K
REDUCED RISK PROFILE

\$547K
ANNUAL SAVINGS

The average cost of compliance in manufacturing is \$5.47M, while a large manufacturing firm with 1,000 employees incurs an estimated \$24.8 million in compliance costs annually. If your compliance costs are \$5.47M and Adept can lower the cost of compliance by 10%, you save \$547K per year!

Synergis Software

Synergis Software is the creator of Adept, the engineering document management platform that helps manufacturing companies transform operations and capital projects for increased efficiency and reduced risk. Adept delivers a centralized source of truth that connects teams and simplifies document access, control, and collaboration. With built-in view and markup tools that support hundreds of formats, along with seamless CAD and business system integrations, Adept redefines operational excellence and empowers growth.
